OSHA Docket  
Docket No. H-122  
Room N-2625  
200 Constitution Avenue, NW  
Washington, DC 20210

Dear Sir or Madam,

Having a person in my house shouldn't prohibit me from smoking there. My home should not have to meet proposed OSHA ventilation standards. It is my house -- I should be able to decide whether or not smoking is allowed there. I feel that if they want to have a place for people to smoke and a place for people who don't smoke, that is fine, but we should not be banned from smoking in a public place. There should be designated areas for smokers. If someone comes to work in my house who said he doesn't smoke, I would not hire him.

Yours truly,

*Sheila Davis*
